1st Proposal

Non-profit organization: The Helpers

Description:

The Helpers Is South Africa's new centralized charity directory that focuses on user needs. This platform connects people seeking help with organizations that can assist them, and it also links those who wish to contribute to the causes they care about.

Created by the team behind good things guys, The Helper emerged from genuine need. The Website allows users to find charities, understand their mission, and reach out to organizations in need of support (The helpers,2026).

Reason for choosing this Organization:

I chose this organization. The helpers play a vital role in linking people wanting to help with trustworthy charitable organizations. A Well-designed Website makes it easier for users to discover these organizations, learn about their mission, and offer their support.

Website Project Goal:

The Primary aim of the Website is to build a user friendly, informative and extremely attractive platform that links South Africans with charitable organizations. It should be simple to use, enabling visitors to locate charities, learn about their work, read news updates, and reach out to these groups for more information and assistance.

Main Menu Pages

1. Home
2. Charities
3. Events
4. News
5. About us
6. Register
7. Contact us
8. Find us

9. Locate charity

Current Website Analysis:

Strength	Weaknesses
Easily links individuals to charities and support.	Having too much information might confuse users.
Main pages are simple to locate and navigate.	Adding more filtering options could enhance search results
Offers a variety of charities all in one spot.	Details about charity verification could be clearer.

Key Performance Measurement:

We will measure the key performance indicators. Through the number of visitors on the website, we will also check how many users contacted the institution for charity giveaways, and checking feedback on user experience.

Design, User Experience & timeline

Area	Recommendation	Timeline
Website design	Contemporary and polished, yet certain parts could make it easier to understand.	1 Week
Search experience	Helpful search feature: add extra filters to get better results.	5 Days
Mobile design	Enhance how quickly and easily users can interact with mobile devices.	6 Days
Accessibility	Enhance the readability of fonts, increase contrast, and provide descriptions for images.	4 Days
User interaction	Make it simpler to access options for donations, volunteering, and offering help	5 Days
Testing	Check the website using various users and devices	2-3 Weeks

2nd Proposal

Mel Wear –Project proposal

Name: Mel Wear Clothing Lifestyle

Organization Type: Retail store

Target Audience: Young adults and fashion-conscious customers globally.

Industry: Fashion and Apparel

Organization Overview

Mel Wear is a South African clothing brand that focuses modern fashionable, trendy, stylish, streetwear luxury clothing. To fashion-conscious customers. The brand offers T-shirts, Sweaters, hoodies, caps and also summer dress codes and also winter clothes like winter Tracksuits.

Project proposal

The Plan is to create a simple and professional website for Mel Wear. This site will give customers details about the brand, display its products, and help customers connect with the business more easily.

Website goals:

- Increase the brands online presence and visibility
- Drive sales and be able to collect enough data on customer behavior.
- Be able to showcase the brands products through an online catalogue
- Enhance communication with customers through Enquiry and contact page.

Proposed pages:

Home

Contact us

Enquiry

About u

products

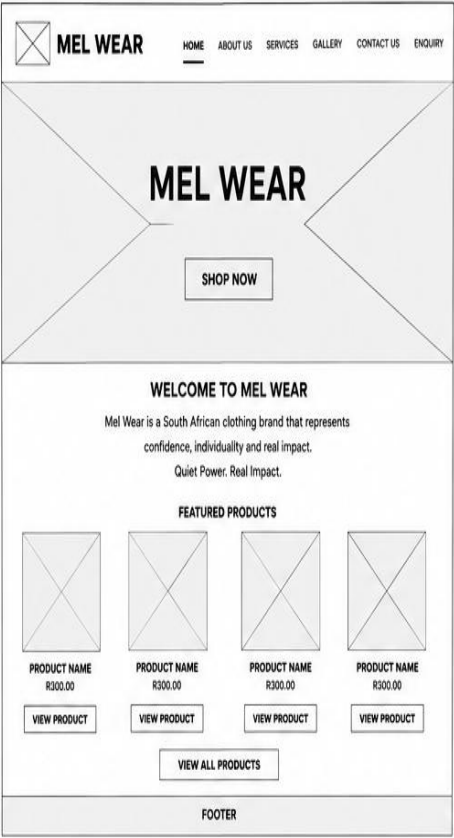

gallery

Expected Outcome:

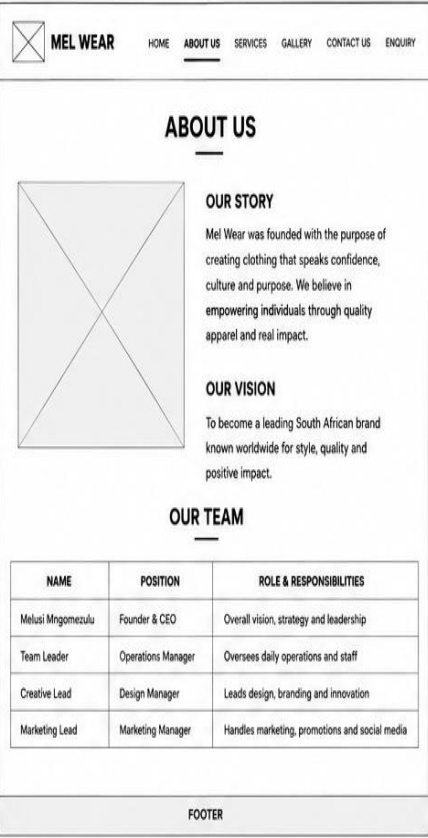

The anticipated result is a well-designed and effective website that enhances Mel Wear's online visibility, displays its products, and offers customers a simple way to connect with the business.

Wireframes

1. HOME PAGE (Index.html)

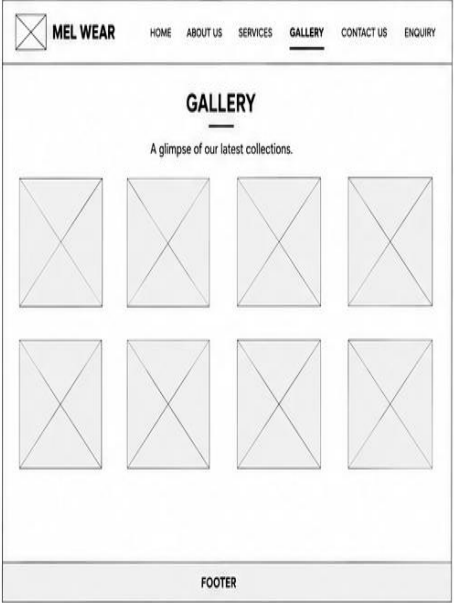

2. ABOUT US PAGE (About.html)

3. SERVICES PAGE (Services.html)

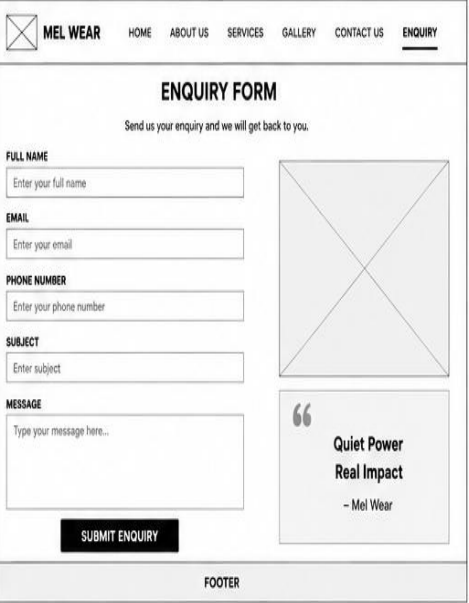

4. GALLERY PAGE (Gallery.html)

5. CONTACT US PAGE (Contact.html)

6. ENQUIRY PAGE (Enquiry.html)

Budget:

Item	Estimated Cost
Website design & development	R4,500
Domain name	R250
Web hosting	R1,200
Logo/graphic design	R500
Product/gallery images	R500
Contact form & Google Maps integration	R300
Testing and fixing links	R500
Estimated Total	R7,750

Design, User Experience & timeline

Area	Recommendation	Timeline
Website design	Contemporary and polished, yet certain parts could make it easier to understand.	1 Week
Search experience	Helpful search feature: add extra filters to get better results.	5 Days
Mobile design	Enhance how quickly and easily users can interact with mobile devices.	6 Days
Accessibility	Enhance the readability of fonts, increase contrast, and provide descriptions for images.	4 Days
User interaction	Make it simpler to access options for donations, volunteering, and offering help	5 Days
Testing	Check the website using various users and devices	2-3 Weeks
